

Proven External Coating Solution

**Since 2015, Workstrings has coated
over 4,500,000 feet with zero tube corrosion downgrades**

Workstrings International offers a proven external coating solution designed to minimize pipe corrosion in completion and water-based environments. This exclusive coating system delivers superior protection and durability across a wide range of operating conditions.

This proven coating provides a protective film with excellent adhesion and flexibility, and is resistant to abrasion, impact, chemical exposure, and acid splash.

Applying this external coating enhances corrosion mitigation on completion, intervention, and drilling tubulars operating in water-based or corrosive environments.
